

APTQI in Florida

The Alliance for Physical Therapy Quality and Innovation (APTQI) unites community-based physical therapy practices to advocate for the profession in the areas of payment reform, quality initiatives, patient outcomes and innovation.

We work collaboratively with other leading professional groups to advocate for transparency, collaboration and an approach that will position the therapy profession as vital to our nation's healthcare delivery system. We are focused on increasing understanding of what we do by proactively advocating for therapists and the patients we serve.

Across Florida, APTQI members operate 287 community-based physical therapy practices.
